

Recovering From Burnout

*Write your thoughts, pause, or talk to a trusted adult whenever you feel ready.
Mental and emotional exhaustion from chronic overwhelm*

WHAT IT FEELS LIKE

Feeling emotionally and mentally exhausted after prolonged stress, academic pressure, or having too much on your plate for too long. Rest is a biological requirement, not a reward you have to earn.

GROUNDING RESET

'Battery Check' Self-Audit

Rate your current mental energy from 1 to 10. Identify the top 2 things currently draining your battery, and name one non-essential task you can pause, drop, or ask for support with today.

Take 3 slow breaths. You do not need to rush or figure everything out at once.
